

For Immediate Release

**ECE Design Updates PLANTMO with Pipe Support Module that works directly with CADWorx
PLANT Professional**

Chicago, January 26, 2009 – ECE Design announced today an updated edition of its PLANTMO software. This software is an Add-on for CADWorx PLANT Professional which enables users to leverage the component information within 3D Piping Models. PLANTMO now offers users the ability to define unique piping supports, assign illustrations and maintain bills of material. In addition, the automated pricing features will tally up the cost of each support design and the overall support hardware cost on a project. All the support design data is easily imported and exported using Excel worksheets.

Typical issues associated with managing pipe supports on a piping project are now addressed by PLANTMO. Now, CAD and Non-CAD operators alike can access and apply a centralized project pipe support database. PLANTMO does not require any CAD knowledge, so it is perfect for the piping support designers, engineers and other team members who now can work in parallel with CAD Operators.

“This advancement in PLANTMO is going to bring companies a great benefit when managing piping supports on any project. So many of our clients have been asking for a pipe support solution and we are pleased to deliver one that is so effective.” explained Bill Vasey, President. The latest update provides companies, with many best practices and how-to methods for improving their efficiency, quality and throughput when using the software.

About ECE Design

ECE is a mechanical, electrical and software integration company that resells and develops software for multiple plant design and engineering disciplines. ECE’s aims are that design and engineering should share relevant information seamlessly, thereby maintaining accuracy and improving efficiency. ECE’s implementation services and software product line conforms to those goals and includes: COADE’s CAESAR II, PV Elite, and CADWorx; iDesignOffice’s IDO Engineer, IDO Wiring Manger and IDO Designer; ECE Solution’s PIDMO and PLANTMO.

COADE, CAESAR II, CADWorx, PV Elite, CodeCalc and TANK are registered trademarks or trademarks of COADE, Inc. iDesignOffice, IDO are registered trade marks of iDesignOffice Pty Ltd. For more information, visit www.ecedesign.com.
